

PROFESSIONAL SCRUM TRAINING OVERVIEW

An overview of Professional Scrum Training™ courses created by Ken Schwaber, Scrum.org, and the Professional Scrum Trainer Community

Scrum.org, as part of our mission, provides the highest quality Scrum training, including the most advanced training materials and certified Professional Scrum Trainers™ (PSTs) to deliver it. The curriculum and courseware are highly-tuned and standardized.

Training materials are created and maintained by our founder, Scrum co-creator Ken Schwaber with the PST community, helping to ensure that they are always in tune with what's happening in software development organizations and always up-to-date with the latest practices.

Courses are provided around the world. Our PSTs offer public courses and can work with you to plan a private one to meet your organization's specific needs. For globally distributed organizations, our PSTs work together to provide training, ensuring that everyone is learning the same thing.

Our trainers bring their own style and experience to courses, but all trainers use the same materials around the world so that students are learning from the same content regardless of where the course is taught and who is teaching it.

Professional Scrum Courses

Professional Scrum Master™

Professional Scrum Master (PSM) is a 2-day course where students learn how to use Scrum to optimize value, productivity and the total cost of ownership of products. Tools are provided to enable students to relate to behavioral shifts, work with people and teams, coach and facilitate techniques, and address the organization.

Professional Scrum Master II™

Professional Scrum Master II (PSM II) is a 2-day advanced course designed to support experienced Scrum Masters in their professional journeys. This course is a combination of instruction and facilitated exercises looking at the challenges that Scrum Masters face and how the principles and values of Scrum help them to deal with those situations.

Professional Scrum Foundations™

Professional Scrum Foundations (PSF) is a 2-day course that teaches Scrum by experiencing what it's like to deliver products using the Scrum framework. Working in Sprints, students break into Scrum Teams fulfilling all of the roles on a team to deliver a product, simulating real-life problems.

Professional Agile Leadership Essentials™

The Professional Agile Leadership (PAL) Essentials is a modular workshop, adaptable up to 2-days in length based on the needs of your organization. The workshop provides a foundation for the role that leaders play in creating the conditions for a successful agile transformation using a combination of instruction and team-based exercises.

Professional Scrum Product Owner™

Professional Scrum Product Owner (PSPO) is a 2-day course on how to maximize the value of products and systems. Product Owners need to have a concrete understanding of everything that drives value from their products where students learn through instruction and team-based exercises.

Professional Scrum Product Owner™ - Advanced

Professional Scrum Product Owner - Advanced (PSPO-A), Mastering the Product Owner Stances is a 2-day course focuses on helping experienced practitioners expand their ability to establish a solid vision, validate their hypotheses, and ultimately deliver more value to their stakeholders.

Professional Scrum Developer™

Professional Software Developer (PSD) is a 3-day course that teaches all members of the Development Team how to create high quality software using the Scrum framework. Working in a series of Sprints, teams of students collaborate, apply modern engineering practices, and use the Scrum framework to cope with changes.

Professional Scrum with Kanban™

Professional Scrum with Kanban™ (PSK) is a 2-day course that teaches Scrum practitioners how to apply Kanban practices to their work without changing Scrum. Through theory, case studies, and hands-on exercises, participants will understand the importance of transparency and flow as it pertains to the Scrum framework.

Scaled Professional Scrum™

Scaled Professional Scrum (SPS) with Nexus is a 2-day course that teaches anyone involved with formulating, managing, and participating in scaled Scrum product delivery. In the workshop, students use a hands-on case study to learn about Nexus and over 50 practices to reduce dependencies at scale.

Professional Scrum with UX™

PSU is a 2-day hands-on course where students with some Scrum experience learn how to integrate modern User Experience (UX) and design practices into their way of working in Scrum. Scrum.org and its Professional Scrum Trainers created this course with the authors of the book Lean UX, Jeff Gothelf and Josh Seiden.

Certification & Assessments

Each class includes a free attempt at the corresponding level certification assessment. In your Professional Scrum class, you will learn the importance of inspection,

adaptation, and fast feedback cycles. To reinforce those concepts, if you take a Scrum.org class and attempt the certification assessment within 14 days and do not score at least 85%, you will be granted a 2nd attempt at no additional cost.
